PROFILE

Self-taught frontend web developer with 2 years of experience building website and web apps in the **Javascript** ecosystem with modern frameworks like **React** and **Next JS**. I'm extremely passionate and driven to excel at my work with great attention to detail. I follow the best practices to write clean and accessible code. I'm a self-starter and proactive when it comes to improving my overall skillset and learning new technologies. I am a team-player who values humility and growth as a team.

EDUCATION

Aston University - United Kingdom - 2018 - 2020

Master's Degree - Work Psychology and Business, Merit

Eastern Mediterranean University - Cyprus - 2013 - 2018

Bachelor's Degree - Psychology, 3.4/4.0

EXPERIENCE/ PROJECTS

Code for Chicago - Frontend Developer - 2022 - present

I've recently joined Code for Chicago which is a not-profit organization as a frontend developer to help make our community better. We are currently working on building our current website using Gatsby, previously Jekyll. We collaborate like a regular team using **Trello** and **Slack** with bi-weekly meetings.

Personal/Portfolio Website

I built my portfolio/personal website with **React** and **CSS**. Later on, I integrated blogging functionality using **Sanity**. I wanted to have a simple and easy to use UI to improve user experience.

Braindumps - Idea Sharing Platform

Work in progress app. I've built this platform with **Next JS**, **Tailwind CSS** in the frontend and **Firebase** for authentication and database. It's a platform that encourages people to share and discuss every little brain crumbs they have. Our minds work in mysterious ways and creativity can kick in when we don't expect it.

CERTIFICATIONS

- Responsive Web Design
- Javascript Algorithms and Data Structures
