Frontend Web Developer

PROFESSIONAL SUMMARY

Self-taught Frontend Developer with 2+ years of experience building websites and web apps in the **JavaScript** ecosystem with modern frameworks like **React**. I'm extremely passionate, driven to excel at my work with a big appetite to learn and familiar with agile methodologies. A self-starter with excellent communication skills and proactive when it comes to improving overall skill set. I value humility and growth as a team.

KEY SKILLS

- HTML/CSS
- Javascript
- React.js
- Next.js
- Redux Toolkit

- SQL
- MongoDB
- Sass
- Firebase
- Tailwind CSS

- Git
- Python
- Bilingual (English - Turkish)

EXPERIENCE/ PROJECTS

Code for Chicago - Frontend Developer - Nov 2022 - present

- Code for Chicago is a non-profit organization that helps make our community better, it's a brigade of Code for America that has over 25,000 active members

- Implementing reusable components using semantic HTML to improve accessibility and reduce code repetition by following the DRY principle

- Collaborating with the team using industry standard technologies like Trello, Slack, Microsoft Meet and Git for version control

Personal/Portfolio Website - 2021

- Bought a professional domain address, created the website using React and CSS hosted on Netlify

- Utilized a simple and easy to use UI to improve user experience and build my personal brand in my own website where I share the projects I'm working on

- Integrated blogging functionality using open source CMS Sanity

Braindumps - Idea Sharing Platform - 2022

- Created a CRUD application that has the ability to create new user accounts, updating user info, sharing posts and deleting posts with integrated realtime database

- Utilized modern technologies like **Next JS**, **Tailwind CSS** in the frontend with a clean and responsive UI

- Managed authentication and realtime database using **Firebase** in the backend
